

# COLLEGE OPPORTUNITIES

for Schools

[www.southampton-city.ac.uk](http://www.southampton-city.ac.uk)

City College works with schools throughout Southampton and Hampshire to provide professional and technical education and training for young people aged 14–16. Our dedicated team will work in partnership with your school to create tailored education based on your students' needs, to ensure that they succeed and progress onto the next stage of their career.

subject areas available:

Hair / Beauty

Motor Vehicle / Engineering

Early Years

Catering

Vocational Studies

ESOL

## What are the benefits?

By attending college, your students can gain a variety of new skills and a vocational qualification. It can help them build their levels of confidence and independence as well as experiencing college life in preparation for their post-16 options. We have found this experience improves attendance and interest at school, focusing students on their future and progression. For some students, the chance to learn in a different setting with a clear vocational focus helps them to understand the value of their school study to their likely future careers.

## Why City College?

- A dedicated team to ensure the students get the best experience from their time in college
- A dedicated contact for your programme
- Daily attendance information
- Regular updates on your students' progress
- Excellent value for money

*“It is great to see our students learning new practical skills in a different setting from their usual school environment, with more independence than is possible in the structure of the school day”*

Carole Silk,  
Regents Park Community College

## What we offer

### Group programmes

We offer mixed school classes in set subject areas each year, enabling schools to send a small number of their students. These are typically arranged for half a day a week over two years.

You can also decide to commission a bespoke group activity, leading to a qualification that could contribute to Progress 8. These can be planned to fit with your Key Stage 4 options timetable. Group sizes are negotiable.

### Individual programmes

If you do not have a whole group, you can refer individual students to us and we will create a bespoke programme for them, based on your specification. This is charged at an hourly rate.
